PURCHASING PRICING SCHEME*

Three main possibilities:

A. Fixed purchasing prices

An annual contract of sale is clear to both parties, no flexibility allowed for market fluctuations. Market risks are on the account of Orsero but sometimes purchases are made on a weekly basis. Products: chiefly bananas and pineapples.

B. Free consignment like

The return for the grower is defined only after all the products are sold, deducting from selling prices direct expenses (packaging, handling, transportations) and a commission for Orsero to cover warehouse and GS&A costs. This scheme is only feasible on the base of trusted and longstanding relationships. Sometimes, a profit split scheme is also deployed. Growers keep the most of market risks and opportunities. Products: seasonal and counter seasonal campaigns.

OR

C. Minimum guaranteed price

A minimum guaranteed price is common in the fresh fruit and vegetable trade. It provides the growers with a minimum return, while the rest will depend on market conditions. This scheme allows for greater flexibility than fixed price, growers and Orsero partially share the market risks and opportunity. Products: seasonal and counter seasonal campaigns.

Focus on shipping • Bananas and pineapples

The Group operates a weekly refrigerated transport service for 4 sister ships "Cala Rosse" (built in 1999/2000), under its ownership, and 1 leased ship.

Time-sensitive product benefits from our dedicated transport lines and the quick debordering, maintaining its quality and freshness.

Our property ships allow us to directly control the volatile costs of transport of our main all-year products.

~10.500 PALLETS loading capacity

Eastbound / front haul trip

Refrigerated loads of bananas and pineapples transported from Costa Rica and Colombia to Southern Europe, approx. 50% of the loaded volume belongs to the Group.

Westbound / back haul trip

We utilise the fleet to the fullest: dry cargo containers transported from Spain / Italy and unloaded in the Dominican Republic and Costa Rica.

It is important to acknowledge that to uphold the navigation class, we must conduct dry docking activities on the four owned ships. These activities take place every five years and are spread over a two-year timeframe. The last cycle occurred between 2019 and 2020, while the current cycle is taking place in 2024 for two of the ships, while the remaining two underwent dry docking in the second and third quarters of 2025.

Competitive landscape • The international context

Orsero has conquered a notable place in the international market over the years, enjoying its size and growth rate.

Fresh Fruit and Vegetables distribution is highly **fragmented** internationally and even more so in Southern Europe, where some of the **major players** have been involved in an **M&A/consolidation phase**:

- 2015: *Chiquita Brands International* (US) was bought and delisted jointly by *Cutrale Group* and *Safra Group* (BR)
- 2017: *Fyffes* (IR) was bought out and delisted by *Sumitomo Group* (JP)
- 2018: *Total Produce* (IR) acquired a 45% stake of *Dole Food* (US), with an option to buy 6% more
- 2021: *Total Produce* (IR) and *Dole Food Inc.* (US) completed a merger agreement becoming *Dole Plc.* (Irish company listed on NYSE)

- **Economic and Financial response**

- In H1 2025, capex are in line with expectations, following the Group's distribution footprint and counting improvements to buildings and equipment across the warehouses in Italy, France and Spain and the dry docking and upgrades of the vessel Cala Palma (Cala Pedra's dry docking activity will be performed in Q3). The mentioned investments are also carried out in alignment with the Group's ESG strategic plan.
- Interest rates situation: the hedging strategies put in place by the Group allow for substantial stability in the cost of debt
- **On May 14, a dividend of 0,50 €/share has been paid to Orsero shareholders with a total outlay of abt. 8,4 M€**

- **Guidance FY 2025 revised upwards**

- **Market context**

- In the first half of 2025, food inflation stands at higher levels in comparison to general inflation*, however, with no significant impact on consumer spending. In fact, the Group registers both higher volumes and prices, the latter as a consequence mainly of product mix and inflation as well. Despite ongoing geopolitical uncertainty, the Group's operations have substantially remained unaffected on the US tariffs front, particularly as Mexican avocados continues to benefit from T-MEC protections, while the main European business does not export to the States. The Group has once again demonstrated an above market average growth.

- **Distribution BU**

- Sales growth of +13,7% vs H1 2024
 - Sales grew thanks to the increase in both volumes and prices, driven by the contribution of the high value-added categories and in particular of kiwifruit, exotic fruit, table grapes, citrus, bananas (despite some supply scarcity) and fresh-cut.
- Adjusted EBITDA margin comes in at 4,7% vs 4,5% in H1 2024, in the light of:
 - Valuable output of the following F&V campaigns: kiwifruit, exotic fruit, platano Canario, pineapples, table grapes, citrus and fresh-cut.

- **Shipping BU**

- Satisfying overall result, with record loading factor over 95%
Adjusted EBITDA of 15,1 M€, representing 25,2% of net sales (H1 2024: 22,2%)
